Main LV supplies into tunnels are often provided with a back-up stand-by generator and our Mains Distribution Assemblies (MDAs) can incorporate Manual or Automatic Changeover systems to switch ...

PDPM100F-M - APC 100kVA Modular Power Distribution Unit, 208V, 72 Poles, MBP, 1 Subfeed.

Tunnel receptacle combination are key components of every tunnel system. They need to meet extremely strict requirements in terms of stability and strength. Our specially developed power ...

The Tunnel Distribution & Lighting Box provides tunnel contractors with a complete solution for temporary electrical installation that complies with competent local authorities.

The PDPs are used to provide power to equipment requiring 120/208 VAC electrical power. The 100 KW PDP is designed to accept power at 120/208 VAC, 3-phase, utilizing 400 amp input terminals.

Starting from the main distribution, the TAP box supplies power to your individual tunnel applications, such as the lighting and evacuation systems. This protects the main distribution from short circuits.

These PDUs are designed for efficient power management in Internet Data Centers (IDCs) and industrial applications. We also provide switchgear solutions, external battery/power cabinets, and immersion ...

A fully scalable power distribution system that cost-effectively provides high levels of availability and enables the quick addition of circuits and cord-sets.

The PD Power Systems 100KW PDP is designed to provide power to equipment requiring 120/208 VAC electrical power. The 100KW PDP is designed to accept at 120/208 VAC, 3-phase, utilizing 400-amp ...

The PLC intelligent power distribution box is equipped with PLC as the interlligent control unit along with

100kW Power Distribution Cabinet for Tunnels

monitoring sensors to realize the external environment monitoring and real- time control of abnormal ...
