This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase ...

This publication is designed for those individuals overseeing procurement for the local government they serve with the goal of helping them develop successful RFPs for solar energy ...

Chapter 1 (Market Evolution) provides historical policy and planning context to the evolution of California's market for stationary energy storage from about 2010 when California Assembly Bill 2514 ...

This energy storage technical specification template is intended to provide a common reference guideline for different stakeholders involved in the development or deployment of energy ...

As discussed in greater detail below, these different approaches have significant implications for how energy storage is developed, procured, and financed in these states. Recent ...

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems.

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.

These resources provide information and best practices for federal facilities interested in procuring on-site solar photovoltaic (PV) systems.

Learn about the essential elements of a solar RFP; receive introductory guidance on how to evaluate any proposals received; and be directed towards tools, resources, and sample ...

# 120-foot Smart Photovoltaic Energy Storage Container

With the increasing adaption of renewable energy systems onsite, designed to feed site loads, there is a critical need to develop tools that allow the federal sector to become a mature and sophisticated ...
