How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$51,860 in May 2024. Employment of solar photovoltaic installers is projected to grow 42 percent from 2024 to 2034, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.

How do I become a solar photovoltaic installer?

There are multiple paths to becoming a solar photovoltaic (PV) installer, or PV installer. These workers typically need a high school diploma, but some take courses at a technical school or community college; they also receive on-the-job training lasting up to 1 year. Some PV installers learn to install panels as part of an apprenticeship.

Where can I get a photovoltaic apprenticeship?

For details about apprenticeships or other training opportunities in this trade, contact the offices of the state employment service, technical colleges, the state apprenticeship agency, local photovoltaic contractors, firms that employ PV installers, or local union-management apprenticeship committees.

Are solar photovoltaic installers safe?

Solar photovoltaic installers risk falls from ladders and roofs, shocks from electricity, and burns from hot equipment and materials while installing and maintaining PV systems. To reduce the risk of injury, PV installers must wear safety equipment, such as harnesses, gloves, and hard hats.

What this means is as some companies continue to improve their operations with advanced training techniques and software applications, the newer generation of workers should make it easier to ...

Generally speaking, the Fair Labor Standards Act (FLSA) sets the minimum age for employment (14 years for non-agricultural jobs), restricts the hours youth under the age of 16 may ...

An investigative report that interviewed solar workers hired by temp agencies found that workers often start locally, but then end up traveling for future work, but receive insufficient or no travel ...

Age limit for photovoltaic panel companies to recruit workers

Understanding and promoting age diversity in the workplace are both particularly important considerations for the design and implementation of organisation entry processes, ...

In limited circumstances, you may consider an applicant's age when making hiring decisions. You may give special hiring preference to applicants because of their older age.

In the Solar Jobs Census survey, the vast majority of solar employers (close to 90%) reported some level of difficulty filling open positions.

For the solar industry, these new apprenticeship guidelines offer a clear pathway for individuals looking to enter the clean energy workforce. They also help companies establish ...

Entry-level workers typically start as laborers or apprentices, with upward mobility into crew leads, field supervisors, project managers, or even system designers with further education or ...

About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade. Many of those openings are expected to result from the need to replace ...

Roles involving solar installation and installation of related technologies including battery storage, field service maintenance, electrical work, and sales roles to name a few, are some of the fastest growing ...
