Aquion Energy was a Pittsburgh, Pennsylvania -based company that manufactured sodium ion batteries (salt water batteries) and electricity storage systems.

The deep-cycle battery is an excellent and reliable energy source for all types of devices, even powering off-grid homes that require high-capacity battery banks to supply their energy needs.

The Aquion battery is composed of a saltwater electrolyte, manganese oxide cathode, carbon titanium phosphate composite anode, and synthetic cotton separator. The battery utilizes non-corrosive ...

Aquion Energy is the manufacturer of proprietary Aqueous Hybrid Ion (AHI(TM)) batteries and battery systems, optimized for stationary and long duration daily cycling and energy storage applications. ...

Designed for years of hassle-free operation in stationary, long-duration applications, AHI batteries are optimized for storing energy for residential, off-grid, and microgrid applications.

Aquion makes their battery from a combination of nontoxic materials, including salt water, a carbon composite material, and manganese oxide, an idea developed by Carnegie Mellon professor Jay ...

Aquion Energy's main product was the Aqueous Hybrid Ion (AHI) battery, a sodium-ion battery designed for grid storage. Its unique value proposition lay in its non-toxic, cost-effective, and ...

Aquion batteries are made of common, safe materials. These features make AHI batteries simple to manufacture, safe, sustainable, inexpensive, robust, and abuse-tolerant.

Aquion Energy's Aspen 48S-2.2 battery is a modular building block for clean energy storage systems. Based on Aquion's safe, clean, and sustainable Aqueous Hybrid Ion (AHITM) technology, the Aspen ...

Aquion Energy is the manufacturer of proprietary Aqueous Hybrid Ion (AHI) batteries and battery systems,

Aquion battery

optimized for stationary and long duration daily cycling and energy storage applications. ...
