Are fossil fuels keeping pace with renewables in Asia-Pacific?

Energy Monitor analyses power plant plans across Asia-Pacific and concludes that here, more than anywhere else in the world, fossil fuels are keeping pace with renewables. This is the third of three exclusive data stories to gauge the global energy transition in electricity. The story of Asia-Pacific in the 21st century has been one of boom times.

How many new biomass plants are being built in Asia-Pacific?

Hundreds of new biomass plants are set to be built across Asia-Pacific, with existing capacity of 65GW set to be boosted by a further 12GW. New plants are for the most part scattered across China (3GW), Japan (3GW) and India (2GW), the region's three largest economies.

When will wind power develop in Asia-Pacific?

Wind power is set to develop in a big way in Asia-Pacific between now and 2030, shows GlobalData's dataset. Total capacity currently stands at 347GW, and will grow by a further 285GW from new projects coming online between now and 2030.

Which countries are investing in new hydropower?

South East Asia is investing particularly heavily in new hydropower, with Myanmar (31GW), the Philippines (16GW) and Vietnam (9GW) all set to see significant capacity increases. Indonesia is also building new dams across its many islands, with 21GW in the pipeline.

The new Belize Energy Resilience and Sustainability Project will deploy state-of-the-art battery energy storage systems across four strategic locations in the country, marking a significant step forward in ...

Hundreds of new biomass plants are set to be built across Asia-Pacific, with existing capacity of 65GW set to be boosted by a further 12GW. New plants are for the most part scattered ...

Paris, May 27, 2024 - TotalEnergies, together with the operator Petrobras and their partners in the Atapu and Apia consortiums, have taken the Final Investment Decision (FID) for the second ...

The project closed on 31 December 2023 but some defects were identified under Phase 2 of the project, so the Ministry of Meteorology, Energy, Information, Disaster Management, Climate Change and ...

## Are there any new energy sites in Apia

The commission said earlier it will introduce a plan for new energy storage development for 2021-25 and beyond, while local energy authorities should also make plans for the scale and project layout of new ...

The Renewable Energy Project will deliver a solar battery power station and mini-grid to each of these islands, providing reliable clean energy access to all residents.

The plan to upgrade the Apia Port will make it safer, more efficient and more environmentally sustainable. That's the goal of a \$166.8m project signed by the Asian Development ...

New energy storage project in Kiev DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread across six sites that ...

Incorporating cutting-edge battery energy storage systems, the project will significantly improve grid reliability by mitigating intermittencies associated with renewable energy sources.

We were awarded the contract to build the 2.2MWp Solar Farm at the Apia Racecourse in Samoa. The Racecourse Solar Farm was opened during the Small Island Developing States ...
