Argentina, located in southern South America, covers a vast expanse of 1,073,500 square miles (2,780,400 square kilometers), making it the second largest country in South America, ...

The observatory is located north of Bajada del Agrio, near the Salado River on provincial route 33, in the so-called Pampa de Pilmatué, in the deserts of Patagonia. The station is based on a two-square-kilometer plot and houses a 35-meter antenna. It is the first Chinese deep space earth station built outside China. The land was leased in 2012 to the Chinese government for 50 years of use, and the agreement includes a tax exemption.

Argentina, country of South America, covering most of the southern portion of the continent. The world's eighth largest country, Argentina occupies an area more extensive than Mexico and the ...

Considered one of the countries that offers the greatest diversity worldwide, many of its natural sites are protected as natural reserves and national parks and have even been recognized as World Heritage ...

Located near Bajada del Agrio in the Loncopué Department, this 200-hectare site hosts a 35-meter-diameter parabolic antenna primarily supporting China's Lunar Exploration Program and ...

Argentina's Congress did not approve the station until February 2015. However, construction had already begun in 2013, and it was completed in 2017. The base, which China ...

It is the only base of its kind outside of China, with just two other similar facilities, both located within the country. The base is pivotal to the operation of the Asian power's ambitious space ...
