Discover the key features of a modern battery pack assembly line and how expert design and automation can boost performance, flexibility and output.

Immerse yourself into the realm of pack assembly and end-of-line (EOL) testing with our animation, crafted to showcase the custom solutions offered by Bosch Rexroth for battery manufacturing.

Our control technology enables end-to-end automation of all processes in battery manufacturing: from electrode production to module and pack assembly. PC-based control offers advantages for all ...

Contact us today to learn how our battery assembly automation solutions can transform your production line and deliver the performance you need in today's fast-paced market.

We support you with concepts, production methods or trial equipment up to production support during the start-up phase and service after project handover. We stand for long-lasting innovations: from ...

For cell/module pack assembly, PIA Automation offers flexible and highly automated systems for the efficient production of battery cells, modules, and battery packs. These systems are scalable, ...

This state-of-the-art production line achieves seamless automated battery pack production. Spanning an impressive 16 meters, it integrates cutting-edge technology through the following equipment.

With flexible systems and smart technologies, our robots streamline battery pack assembly, cut costs, and improve both quality and worker safety. Automated solutions for the application of the thermal ...

We support you with concepts, production methods or trial ...

As a result of our partnership with Bosch, we have identified several key process improvements in developing

Battery cabinet production line automation

an automated battery cell assembly line. Some of these processes are typical of any cell ...

This state-of-the-art production line achieves seamless automated battery pack production. Spanning an impressive 16 meters, it integrates cutting-edge ...

Industrial Automation Solutions for battery manufacturing: cell, pack, cabinet, and test automation with MES for full traceability.
