Contact a member of our expert Battery-Testing Team today, and they will work with you to help you select your custom combination of Tenney SafeTest(TM) options for your battery test chamber.

Our Battery Testing Enclosures and Walk-in Chambers are designed to handle the risks associated with battery testing, especially thermal runaway events that can cause overpressurization and explosions.

Our battery test chambers are designed to test Lithium Ion batteries, lead acid, Battery Managements Systems (BMS), battery packs, modules, battery cells, and more. Our battery test chambers also ...

We can customize your environmental and safety chambers with fixtures, holders, testing channels, and other devices to fit your unique battery needs. SpectraPower provides engineering, design, and ...

We provide battery safety test chamber from cell, module and pack according to different standards, such as UN38.3, IEC62133, ECE R100, UL2580 and so on.

Our innovative battery test chambers are specifically designed for testing lithium-ion cells and modules. Battery tests are complex and require the highest safety standards to minimize potential hazards.

A detailed guide explaining the key safety considerations when selecting a safety box for lithium batteries--covering fire resistance, ventilation, alarms, and evacuation needs.

We provide a full selection of safety options for reliability and abuse testing of batteries. Each environmental chamber is designed with safety in mind. Safety features may be incorporated into ...

NEWARE explosion proof cabinet for charge and discharge testing. Stainless steel with double door, featuring heat dissipation, corrosion resistance, and explosion proof properties, suitable for battery ...

Tenney Environmental designs and manufactures walk-in battery test chambers in a wide range of temperature

Battery cabinet safety tester

and humidity conditions. These chambers are used to safely and reliably test batteries ...
