Do you test and certify your batteries?

We test and certify your batteries to various global battery testing standards including, but not limited to: IEC 62619 - Safety requirements for secondary lithium cells and batteries, for use in industrial applications. IEC 62660 - Secondary lithium-ion cells for the propulsion of electric road vehicles.

Why should you choose TÜV Süd for battery testing?

Battery compliance and certification - Meet local, regional, and global battery testing standards and obtain battery certification that helps you gain customer confidence by providing safe, reliable and high-quality batteries for various industries. TÜV SÜD is your trusted and neutral third-party technical service provider for battery testing.

Why do you need a battery test?

The tests ensure that batteries fulfil legal, industry and manufacturer requirements to be able to achieve battery certification. Working with TÜV SÜD as an expert partner for battery testing will provide multiple benefits to you:

Why do you need a trusted battery testing partner?

As your trusted partner, we will validate your battery's conformity and performance, enhancing battery safety, reliability, performance and consumer trust. It also helps you reduce the risk of costly product recalls and speed up your time to market. Batteries must not pose any danger to people, not even under extreme conditions.
