-----

In a new study by SEIA and Synapse Energy Economics, researchers compared a future where Massachusetts continues to add new solar and storage capacity as planned through 2030, ...

Massachusetts is one of the first states to provide comprehensive guidance focused on parting energy storage with solar panels; Massachusetts became the first state to allow behind-the-meter (BTM) ...

This innovative collaboration with Enel X will enable us to take the campus to the next level by generating and storing energy in a fashion that minimizes our costs and maximizes the value of the ...

The city wants to show that distributed energy resources, such as solar and storage, can sustain community lifelines during power outages while reducing carbon emissions and alleviating the sizing ...

In 2026, solar is no longer just about panels; it's about energy independence. Battery storage (like the Tesla Powerwall) allows you to use your solar energy at night or during a power ...

Massachusetts aims for 5,000 megawatts of battery storage by 2030, but residents voice safety and environmental concerns over the rapid expansion.

With a clear goal of 5,000 MW by 2030 and a solid procurement plan, Massachusetts stands out as a prime market for energy storage technologies like lithium-ion, flow batteries, iron-air ...

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials...

Per *Kearsarge Walpole v. ZBA Walpole*, municipalities may not prohibit ground-mounted solar outside of an overlay district that covers only a small percentage of total land. Existing local BESS bylaws from ...

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making

# Can Boston do solar energy storage

up over 50% of the increase. Solar. In 2024, generators added a record ...
