The Canberra CAES project isn't just local news - it's a blueprint for global energy transition. By combining proven physics with modern engineering, compressed air storage offers a pragmatic path ...

According to the CSIRO, the Hub will focus on providing services, including manufacturing, logistics and maintenance, for onshore and offshore wind renewable energy projects.

The \$10 billion Gippsland Dawn project was shut down over shareholder concern about the industry's viability in recent months and the Novocastrian Offshore Wind Farm off Newcastle is ...

Technology continues to advance at pace with floating offshore turbine technologies allowing access to a far greater range of suitable offshore locations for energy generation.

Battery storage projects are also being developed across the ACT to limit reliance on a centralized grid, including 5,000 storage batteries in homes and businesses.

Recent offshore wind projects and renewable wind zones announced in Victoria, New South Wales, Tasmania and Western Australia, illustrate the sector's potential in Australia.

West Australian energy minister Reece Whitby has cast doubt on whether offshore wind is suited to the west coast after several developers dropped plans for projects, exposing a rift with...

Designed to tackle the intermittency of wind and solar power, this pumped hydro initiative could store enough electricity to power 200,000 homes for 8 hours--equivalent to keeping Sydney Opera House ...

In May 2024, the Australian government granted initial licenses to six offshore wind projects with a combined capacity of approximately 12 GW and by July 2024, a further six offshore wind projects ...

# Canberra offshore wind power storage project

Using Corio's Great Eastern offshore wind project as an example, we are in year three of a seven-year development process. This includes site selection, project approval, engineering, ...
