The Photovoltaic (PV) Bracket Production Line is a fully automated solution designed for the mass production of solar mounting structures (solar struts/channels).

The machine is able to produce 2 or 3 or more types of strut channel by adjust the roll forming mould. The standard strut channel sizes are: 41*41, 41*21, and also some customized shapes.

Our solar photovoltaic bracket roll forming machines utilize high-strength steel or aluminum coils, ensuring brackets withstand extreme weather, heavy snow loads, and corrosion.

The solar bracket production line is designed to produce high-quality solar PV supports with increased efficiency. Features a user-friendly PLC control system for automated operation.

With stability, precision, and automation, the HOPEX photovoltaic bracket roll forming machine provides an efficient and reliable solution for solar mounting manufacturers.

A PV mounting bracket roll forming machine is a type of machine used to create metal brackets used to mount solar panels. These machines are capable of creating brackets of various sizes and shapes, ...

These brackets are the backbone of solar panel support systems, providing strength, durability, and adaptability across various installation scenarios. But how are they manufactured at ...

The Photovoltaic/PV Bracket Roll Former (strut channel roll forming line) is specifically designed to produce C-shaped brackets with pre-punched holes, widely used in photovoltaic support systems.

The surface of carbon steel is hot-dip galvanized and will not rust for 30 years of outdoor use. The characteristics of solar photovoltaic bracket system are no welding, no drilling, 100% adjustable and ...

These rolls progressively shape the flat metal strip into the final channel profile with tight tolerances and

Cdr photovoltaic bracket roll-up

excellent dimensional consistency, ensuring perfect fit-up in the field.

The Photovoltaic/PV Bracket Roll Former (strut channel roll forming line) is specifically designed to produce C-shaped brackets with pre-punched holes, ...
