China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's bright sunshine, cold temperatures and...

More than 720 GW of solar capacity are in development: about 250 GW under construction, nearly 300 GW in pre-construction phases, and 177 GW of announced projects, ...

It covers all operating solar farm phases with capacities of 1 megawatt (MW) or more and all announced, pre-construction, construction, and shelved projects with capacities greater than 20 MW.

Explore China's massive solar megaprojects. Learn how gigawatt-scale photovoltaic farms in remote regions are reshaping the global energy landscape.

As the Trump administration's "Big, Beautiful Bill" eliminates many clean-energy incentives in the U.S., China continues huge investments in wind and solar power, reportedly accounting for 74...

A solar power project in the Gobi Desert has moved the needle on the size and scope of global photovoltaic installations, aided by innovation in equipment and construction.

Construction is in full swing to build a 200,000-kilowatt concentrated solar power (CSP) generation system in Delingha City, northwest China's Qinghai Province. Local officials said the city ...

Dunhuang Huineng Photovoltaic Power Project (20 MW) in Gansu is the first photovoltaic power project developed by POWERCHINA by using the integrated model ...

Almost three-quarters of all solar and wind power projects being built globally are in China, says a new report that highlights the country's rapid expansion of renewable energy sources.

China Solar Power Generation Project Construction

Renewable energy projects, such as solar power plants, have been built in western regions of China where many native nomadic people have had their land taken away.
