-----  
How can we help communities build and operate microgrids?

Using our technical, regulatory and policy expertise on community energy systems, we can assist these communities to build and operate microgrids. This website provides vital information on microgrid planning, design, and other relevant aspects (business models, policy and regulatory aspects).

What is a community-owned microgrid?

For instance, community-owned microgrids may outsource the planning, construction, and operation of the system . In such cases, even though the community has ownership, the decision-making and control might be distributed across external actors .

What is an example of a community microgrid?

For example, a community microgrid in a rural area may have different objectives than a community in an urban setting [12, 20]. The rural community may prioritise energy independence and self-sufficiency, while the urban community may focus on reducing greenhouse gas emissions or increasing access to affordable energy .

Who owns a community microgrid?

Ownership and governance structures The ownership and management of community microgrids can vary greatly, from being owned and operated by utility companies, local members, third-party investors, or a combination of them . Governance structures can similarly vary, encompassing energy cooperatives, corporations and no-profit associations .

Ascendancy of community microgrids unlocks universal energy access, accelerates sustainable development, strengthens climate action, and positions Africa as a global leader in ...

There are many communities in the world vulnerable to natural disasters, however, they require support and expertise to develop microgrids. Using our technical, regulatory and policy expertise on ...

Half of the beneficiaries from two rural communities - Bulimeni in the Shiselweni Region and Mvundla in the Manzini Region - are women. These communities are remotely located making it difficult for the ...
