Through media campaigns, we sensitized over 2 million people on sustainable natural resource management, leading to reduced charcoal demand. We facilitated the transition of 5,000 households ...

Hargeisa (Dawan Africa) - Somaliland President Abdirahman Mohamed Abdullahi "Cirro" has announced an emergency response campaign aimed at assisting communities in Awdal, Sanag, ...

According to the World Food Programme (WFP), a quarter of Somalia's population is forecast to face "crisis-level hunger or worse" due to drought and floods. Environmental changes, ...

The Government of Somaliland urges quick responses, as delays would result in ineffectiveness of response, loss of life and livelihood, and an increase in the vulnerability of drought-affected people.

In 2022 and the first half of 2023, Somalia experienced its worst drought in decades, resulting in millions of people requiring aid and thousands facing an increased risk of famine.

MORHA strongly appeals to all humanitarian partners, international organizations, local NGOs, and donor agencies to prioritize Lasciidle and Xagal within their drought response planning.

Covering six key regions--Awdal, Maroodijeeh, Sahil, Togdheer, Sool, and Sanag--the bulletin provides a monthly assessment of drought and disaster conditions based on end-of-month data collection.

By prioritizing unity, transparency, and strategic action, the government is laying the groundwork for a united and prosperous Somaliland that serves all its citizens. As Somaliland ...

For ActionAid to design and implement its response more effectively, the organisation commissioned an assessment of the Somalia context. This report presents the assessment findings ...

On 23 November, Somaliland appealed for assistance for one million people. The consecutive failure of rains

Demand response somaliland

this year has caused water reservoirs to dry up, increased the pressure on the few functioning ...
