-----

DCX HYDRO CDU 2 is a rack-based Coolant Distribution Unit designed to cool individual high-density server racks. This compact 4U CDU is equipped with unique immersion pumps and delivers over 170 ...

Compare 2025's top power distribution units for server racks. Discover features, scalability, energy efficiency, and reliability to optimize your IT setup.

Key Features: Optimized for OCP ORV3 Racks - Designed to meet the latest Open Compute Project (OCP) standards with 48VDC power supply. 200kW Cooling Capacity - Supports ...

GRC (Green Revolution Cooling) has launched a new immersion cooling design for extreme-density computing that can support up to 200 kilowatts (kW) of server capacity.

For many data centers, liquid cooling offers better performance while reducing energy usage. However, better liquid cooling processes are key to sustainable deployment.

Get the rack PDU needed for your lab, data center or telecommunications operation. Enjoy reduced downtime, improved energy utilization and more.

The CHx200 is a rack-based CDU, built for the needs of today's most demanding HPC and enterprise server requirements. Capable of managing 200 kW of heat load in a remarkably small 4U of space, ...

Learn how kW per rack impacts colocation pricing, energy efficiency, and performance. Discover best practices to manage power, reduce costs, and future-proof your IT infrastructure.

Server Technology's Intelligent rack power distribution units (PDUs) provide a tightly-integrated power solution for rack-level data center power distribution, data center power monitoring, and management.
