The Smart Electric Power Alliance and NC Clean Energy Technology Center's latest report reveals a surge in Virtual Power Plant activity, with 35 states moving forward on policy and regulation ...

Based on recent installations and projections of continued trends, by 2023, the grid will host ten times the amount of battery storage installed in 2019. The policy environment for distributed energy and ...

As the United States grapples with shifting political winds, developers in the distributed solar and storage market are facing a potential policy storm.

The Sustainable and Holistic Integration of Energy Storage and Solar PV (SHINES) program develops and demonstrates integrated photovoltaic (PV) and energy storage solutions that are scalable, ...

-- Today the Solar Energy Industries Association (SEIA) is unveiling a new policy agenda that details the critical actions that local, state, and federal leaders must take to strengthen the ...

NLR bridges research with real-world applications to advance energy technologies that lower costs, boost the economy, strengthen security, and ensure abundant energy.

A sustainable outlook for DES requires not only technological advancements especially on the fronts of grid-connectivity and energy storage but also favorable socio-political environment and ...

The installation of utility-scale storage in the United States has primarily been concentrated in California and Texas due to supportive state policies and significant solar and wind ...

Our topical research on distributed solar and storage covers a broad range of subjects, including adoption and pricing dynamics, policy and program evaluation, grid integration and planning, ...

# Distributed photovoltaic supporting energy storage policy

With the acceleration of the process of carbon peak and carbon neutrality, renewable energy, mainly wind and solar power generation, has entered a new stage of
