-----

Dhaka, Sept. 25 -- Parts of Dhaka witnessed hours of power cuts on Thursday following the partial collapse of the national power transmission grid in the morning.

Around a third of the budgetary allocation set aside for the power division is going to the Power Grid Company of Bangladesh (PGCB) as the government plans to make the most of installed...

Electricity interconnection from the East to the West was accomplished in 1982 by a new, 230-kilovolt (kV) power transmission line. The vast majority of Bangladesh's electricity consumption takes place ...

The window to make Bangladesh's power sector sustainable is rapidly narrowing, but there is still time to get the sector back on track by following a suitable roadmap.

Further, the roadmap suggests modernising Bangladesh's electricity grid to encourage industries to gradually shift to grid power rather than operate gas-based captive plants and minimise ...

PCMs can simulate the hourly or sub-hourly chronological power grid operation. During each simulated time interval, the model selects the least-cost mix of generators needed to meet the electricity ...

In exercise of the powers conferred by section 59 of the Bangladesh Energy Regulatory Commission Act 2003 (Act 13 of 2003), for the fulfillment of the objectives of the Act, the Bangladesh Energy Regulatory ...

Bangladesh's utility electricity sector operates a single national grid, managed by the Power Grid Company of Bangladesh (PGCB), with an installed capacity of 25,700 MW as of June 2022.

In light of these ongoing changes and challenges, the power sector in Bangladesh stands at an interesting turning point. How it evolves from here will be crucial, not just for the sector itself but ...

Although Bangladesh has achieved universal electrification, its power sector faces significant capacity and
