Find here the data on electricity generation in France, presented either in aggregate or in detail by generation type: nuclear, conventional thermal, hydro, solar, wind and renewable thermal.

This page steps through France's energy system, from fossil fuel emissions, to fossil fuel production, primary energy, final energy, and electricity generation.

Overall, electricity generation in France increased by 45 TWh in 2024, while consumption remained relatively steady. Nuclear energy generation increased the most, followed by hydropower, ...

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. ...

Track real-time power generation in France per energy source based on remotely monitored data and forecasts.

Electricit#233; de France (EDF) is the main electricity generation and distribution company in France. It was founded on 8 April 1946 as a result of the nationalisation of a number of electricity producers, ...

The electricity sector in France is dominated by its nuclear power, which accounted for 71.7% of total production in 2018, while renewables and fossil fuels accounted for 21.3% and 7.1%, respectively [1] ...

French gross production of electricity was 557 terawatt-hours (TWh) in 2014, slightly down from 570 and 567 TWh produced in 2008 and 2004, respectively. France is the world's 9th largest producer of electricity. France is also the world's second largest producer of nuclear electricity, behind the United States and ahead of Russia and Korea. In terms of nuclear's share on the total domestic electricity generation, Franc...

France's energy supply was still dominated by fossil fuels and nuclear energy in 2023, the latter of which France is the most strenuous supporter and largest producer in Europe.

Electricity generation france

France's electricity mix includes 70% Nuclear, 11% Hydropower and 9% Wind. Low-carbon generation peaked in 2004.

France has a low-carbon electricity mix owing to its nuclear fleet, yet many reactors are reaching the end of their lifetime. The country has started an ambitious energy transition by designing a national low ...

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your ...
