How much electricity does Lebanon need?

Despite decades of investment, Lebanon's electricity generation capacity remains insufficient to meet the needs of its growing population. As of August 2016, the peak electricity demand in the country was 3,500 MW, but the grid's total capacity was only 2,200 MW.

How has Lebanon responded to the energy crisis?

In response to the energy crisis, Lebanon has seen a significant increase in solar power installations. The expansion of solar energy has been supported by the Net Metering policy adopted by EDL, which simplifies the legal and technical processes for individuals and companies to install solar systems.

What is Lebanon's Future Energy Outlook?

Lebanon's future energy outlook will depend on its ability to implement long-overdue reforms, secure consistent fuel supplies, and expand renewable energy sources like solar and wind power. However, the path to energy stability is likely to be long and complex, requiring both domestic political consensus and international support.

What caused Lebanon's energy crisis in 2024?

These factors have contributed to Lebanon's ongoing energy crisis, characterized by frequent power shortages and heavy reliance on costly fuel imports. In August 2024, the situation reached a critical point when fuel reserves were completely depleted, leading to a nationwide blackout.

Increase Supply of Cheaper, more Sustainable Electricity Supply Improve the Sector's Operational and Financial Performance Improve Sector Governance and Transparency Rehabilitation of the National Control Center and EDL main building. The first step in rebuilding the NCC is to: Short- to medium-term (1-2 years) - Public administrations, refugees and displaced Syrians, water establishments and other entities to pay their overdue and future electricity bills The solutions put in place in this plan require significant public and private capital investments Medium- to Long-term (2-5 years) 5.2. ACTION PLAN Medium- to long-term (3-5 years) 6. CONDITIONS FOR THE SUCCESSFUL IMPLEMENTATION OF THE PLAN Financial Support from the public 7. PROGRESS TOWARD SHORT-TERM OBJECTIVE AND BROADER VISION Transmission and Distribution Financial The first policy objective is ensuring reliable, affordable, and sustainable (24/7) electricity services across Lebanon in an efficient, fiscally balanced, and environmentally friendly manner. This goal should be achieved while accelerating the transition to a sustainable energy future
