Richard Ellenbogen This post was put together by Roger Caiazza to describe a recently completed white paper by Richard Ellenbogen M.E.E. titled The Intrinsic Danger of Siting Utility ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

Utility-scale battery energy storage systems (BESS) are a foundational technology for modern power grids. Unlike residential or commercial-scale storage, utility-scale systems operate at ...

Energy storage batteries are manufactured devices that accept, store, and discharge electrical energy using chemical reactions within the device and that can be recharged to full ...

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024.

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials...

The item of contention on the agenda? The construction of a new 400-mega watt battery energy storage facility that would update the regional power grid's capacity. The public comment was ...

Under the agreement, LG Energy Solution Vertech will supply 5 GWh of lithium-ion battery energy storage systems (BESS) for utility-scale projects, along with full lifecycle services. The ...

By bridging the gap between academic research and real-world implementation, this review underscores the critical role of lithium-ion batteries in achieving decarbonization, integrating ...

Tenders NSW hands out 12 GWh in long-duration storage contracts to six major lithium-ion battery project

Energy Storage Project Lithium Battery

The New South Wales Roadmap Tender Round 6 for long duration storage has ...
