System (SIN) and several isolated local systems in the Non-Interconnected Zones (ZNI). SIN encompasses one third of the territory, giving coverage to 96 percent of the population. The ZNI, which covers the remaining two thirds of the national territory, only serves 4 percent of the population. Thirty-two large hydroelectric plants and thirty thermal power stations feed electricity into the SIN. On t...

Energy overview of Colombia includes data and maps on fossil and renewable resources, balance, infrastructure, ecology, energy production, innovation...

primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end

Colombia's national grid is getting stronger in 2025 with 17 new energy projects, mostly solar, boosting capacity and resilience. Discover how distributed generation, solar power, and ...

Colombia's electricity mix includes 64% Hydropower, 14% Gas and 9% Coal. Low-carbon generation peaked in 2017.

Energy-intensive industries include chemicals, iron and steel, non-metallic minerals (cement and other), non-ferrous metals (aluminium and other) and pulp, paper and printing.
