-----

Spain has approved a landmark Royal Decree to modernize its electricity grid and promote energy storage, marking a significant step in its national energy strategy.

In response to the 28 April blackout, the Spanish government has approved sweeping reforms to strengthen grid resilience, accelerate electrification, and boost energy storage.

This week, the Council of Ministers approved a new royal decree designed to strengthen grid resilience, promote energy storage, and streamline regulatory procedures for renewable and ...

Spain has formally recognized energy storage as a key technology for supporting grid flexibility and integrating renewable electricity. Hybrid renewables-plus-storage projects can now...

Spain has approved a royal decree aimed at strengthening the power grid's resilience, robustness and stability in response to the blackout in April.

Spain's new regulation creates a powerful financial incentive for battery storage, making the grid more stable and accelerating the renewable energy transition.

Spain's Royal Decree 917/2025, effective Nov. 16, 2025, reorganizes grid-access priorities by recognizing storage as a flexibility resource, grants renewables top dispatch rights, ...

To promote energy storage, the decree facilitates the integration of storage systems into the grid -- key to achieving Spain's target of 22.5 GW of installed storage capacity by 2030, as ...

Spain has chosen the 143 energy storage projects that will receive capex support from an EU-backed scheme, totalling nearly 9GWh of capacity.

Its main objectives include: Reinforcing voltage and frequency stability across the grid. Prioritising flexible
