WSL is limited to the following technologies: batteries, flywheels, compressed air energy storage, pumped hydro-electric power, electro chemical capacitors, and thermal energy storage associated ...

A wave of 2025 policy moves just tightened foreign-entity-of-concern sourcing for batteries, right as Texas overtakes California on installed storage. We decode what changed, map ...

The Battery Energy Storage initiative addresses integration of battery Energy Storage Resources into the ERCOT System. This section contains work products from the Battery Energy Storage Task ...

The proposal by the Electric Reliability Council of Texas, Inc. (ERCOT) to require batteries, termed "energy storage resources" (ESRs) under ERCOT rules, to maintain a certain state ...

Three main entities regulate energy storage in Texas: ERCOT (Electric Reliability Council of Texas) operates about 90% of the state's power grid and governs how electricity flows across it in ...

This new construct will prove more accurate price signals to generators and battery storage operators alike. At its core, RTC+B introduces true co-optimization of energy and ancillary ...

ERCOT's board of directors on Oct. 17 unanimously approved the new rule, known as NPRR 1186, requiring batteries to maintain a certain state of charge, or SOC, depending on which ...

The ERCOT Independent Market Monitor (IMM) argued that the proposed requirements will not meaningfully improve reliability, since scarcity pricing is already a motivating factor, and will ...

If there are any Protocol changes that impact qualification or qualified MW based on duration, ERCOT and the appropriate entities will need to discuss prior to transitioning to RTC.

Amendments to rules for battery storage state-of-charge (SOC) in the ERCOT, Texas, market are "an

Ercot battery storage regulations

improvement" to the current ones but will still impact the ability of batteries to provide ...
