What is the ESS price forecasting report (PFR)?

To navigate this complex landscape, companies need a reliable tool to predict future cost and pricing trends. This is the driving force behind Clean Energy Associates' ESS Price Forecasting Report (PFR).

What happened to ESS bid prices in March 2024?

In March 2024, ESS bid prices varied depending on their storage capacity, with an overall downward trajectory evident, particularly in the case of four-hour ESS bids, which hit yet another all-time low. Raw material prices for storage battery are expected to remain stable. At the outset of 2024, battery prices experienced a decline.

What is the price gap between ESS and batteries?

In March, the price disparity between ESS and batteries has continued to shrink. The average price of a 280Ah/0.5C storage battery hovered around 0.38 yuan/Wh in March 2024. According to our data, the average winning price for a 2-hour ESS is approximately 0.63 yuan/Wh, resulting in a price gap of around 0.25 yuan/Wh.

What is the ESS PFR?

The ESS PFR is a crucial resource for decision-makers aiming to make well-informed choices in the ever-evolving energy storage industry.

Estimated at roughly \$73 per kilowatt-hour (kWh) in 2024, the cost of Chinese lithium iron phosphate (LFP) battery cells is projected to climb to about \$87/kWh next year. Domestic ESS cell ...

Our expert editorial team, analysts and price reporters working across the battery raw materials supply chain bring you the latest price trends, market insights and forecasts related to the outlook for the ...

Since 2023, the battleground of pricing has grown fiercer, with the cost of lithium carbonate plummeting, signaling an escalation in the price wars of ESS tender projects. Amidst ...

TrendForce's investigations show that the prolonged price decline in Chinese EV and ESS batteries in 2024 eased in the fourth quarter.

This Interim Update of the Energy Storage System (ESS) Q1 2025 Price Forecasting Report highlights how newly imposed U.S. tariffs are reshaping the cost landscape for imported ...

The ESS Price Forecasting Report provides an in-depth five-year forecast for the price of a DC battery container, including battery cells, modules, racking, and additional balance of system ...

Ongoing supply chain issues, changing global market dynamics, and the rising demand for energy storage solutions are leading to challenges for buyers of energy storage system (ESS) equipment. ...

The price spikes occurred, according to the report, after "successive layers of United States tariffs landed within a 40-day window and manufacturers reset quotes almost overnight."

Energy Storage CapEx prices have dropped from their May highs, but are not as low as they were at the end of Q1 2025, according to the Q3 Energy Storage Pricing Insights Report from ...

Overseas, the progress of ESS projects in North America and Southeast Asia has slowed down, with some battery cell export orders being delayed or reduced, indicating pressure on export ...
