-----  
What is a fake solar panel?

The wiring of the solar panel absorbs sunlight via the circuit on the back. A standard solar panel always contains quality wiring and cables to provide power. A fake panel doesn't have this. In general, most solar panels come in blue color. Fake solar panels may contain other colors. The manufacturing process of silicon makes it blue.

Can a fake solar panel damage your home?

On the contrary, a fake solar panel will damage quickly because of its substandard materials. An original solar panel can perform in any weather conditions including, rain, winter, and storm. But, a fake solar panel can not stand in a hazardous situation.

What are counterfeit solar panels?

Like other electrical products and devices, counterfeit solar panels are also available in the market. Fake solar panels represent the panels that come with faulty design and don't have power production capacity. In general, solar panels are made with silicon, and the standard manufacturing process ensures the quality of the panels.

How do you identify a solar panel company to avoid scams?

These tactics may include persistent calls, scare tactics, door-to-door visits, or making unfounded claims about solar benefits. Companies employing such methods prioritize sales over delivering quality service. These are the red flags to identify solar panel companies to avoid scams.
