Who dominates the 5G market in Finland?

The 5G market in Finland is dominated by three key players, Elisa, Telia, and DNA. The coverage of 5G in the country is challenged by a vast contrast between urban and rural areas.

How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from \$100,000 to \$200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

Is Finland a 5G country?

The country enjoys one of the highest broadband and mobile penetration rates in the region, with customers able to make use of the latest iterations of technologies including DOCSIS3.1, LTE-A, 5G, and GPON fibre infrastructure. Just as Finland was in the forefront of LTE developments in Europe, so has it emerged as one of the pioneers in 5G.

What is 5G test network Finland?

The 5G Test Network Finland (5GNTF) project, which comprises around 50 members from industry, academia, and the Finnish public sector, offers testing, trial and piloting services, and ample opportunities for collaboration within the ecosystem.
