Solar Reflecting Coating How Is Solar Control Measured? Solar Heat Gain Or "G" Value Light to Solar Heat Gain (Lshg) Or Selectivity Insulated Glass Unit Solar control performance is achieved through the use of a very thin, transparent, and permanent coating that helps limit the solar energy entering inside. It helps control solar gain to various levels depending on the coating while allowing natural daylight in and views on the outside.

See more about how glass is coated. See more on guardianglass.
