This area introduces critical sustainability topics and guides visitors toward practical solutions featured in our booth, such as a full-scale AI containerized data center.

This week's Top 10 ranking spotlights the largest data centres worldwide running 100% on renewables, measured by a blend of their output, innovation and impact in driving a cleaner digital ...

The showcase features the newly-launched AI containerized data center solution designed for edge computing. This 20-foot container, which integrates power, cooling, and IT equipment, is on ...

Following the growing applications for edge computing, Delta is introducing a new generation of Containerized Data Center Solutions with flexible power and cooling designs, quick deployment and ...

The company's integrated PV and storage platforms are designed to support both the scale and intensity of modern data centre operations. By pairing solar generation with on-site energy ...

Our pre-engineered, containerized units ship ready to operate with integrated on-site power. This model reduces development time, cuts risk, and delivers immediate access to compute and ...

Explore the top 10 containerized data center companies worldwide, offering innovative solutions for efficient, scalable, and secure data storage and management.

We have successfully combined the eco merits of solar energy and running data centers, transforming them from simple power loads to controllable and adjustable power nodes.

The solar panels, inverters, and battery storage systems are installed and integrated with the data center's
