How often should solar panels be cleaned?

"In areas with high dust, pollen, bird activity, or nearby industry, quarterly cleanings may be recommended to maintain peak efficiency." In many parts of the country, occasional rain is typically enough to naturally and safely keep your solar panels clean and free of debris that could lower their energy production.

Do solar panels need to be cleaned?

If you own your solar panels, your original installer may clean them for a small fee or offer bundle deals with local cleaning companies. Some companies perform regular maintenance on their panels, including washing services, while others just repair damages the customer reports.

Should I clean my solar panels if it rains a lot?

In many parts of the country, occasional rain is typically enough to naturally and safely keep your solar panels clean and free of debris that could lower their energy production. So, if you get a good amount of rain this year, you can likely skip a cleaning or two.

How can I tell if my solar panels need cleaning?

If you notice visible dirt buildup, stains, or obstructions on the surface of your solar panels during regular visual inspections, it's an indication that they need cleaning. Addressing these issues promptly can help prevent further decrease in energy production and ensure optimal performance.
