What is Weibo & how does it work?

It allows creators, influencers (KOLs), and brands to open a shop directly on their Weibo profile to sell products and services without redirecting followers to external websites or apps like Taobao or JD.com. While the emoticon, photo, video, and hashtag icons are present, the article function, meatballs menu and its associated functions will not appear here.

Is Weibo a good social media platform?

Typically, posts with images, infographics, and videos are more popular.
