Construction of Africa's first hybrid renewable energy project, combining wind, solar, and battery storage, is expected to commence this year in Meru County, Kenya.

Kenya has reaffirmed its commitment to accelerating solar energy deployment and integrating energy storage solutions as Intersolar Africa 2026 officially opened on Tuesday at the ...

The Meru Energy Park will be Africa's first hybrid facility combining wind, solar, and battery storage in a single grid-connected operation. Statistics & Insights: The facility will generate 220 ...

While KenGen's BESS project shows how storage can help with reliability, a country aiming to run entirely on renewable energy by 2050 will need not just dozens but possibly hundreds ...

Together, these assets deliver dispatchable, renewable power to Kenya's grid, enhance system resilience, and pave the way for future large-scale hybrid projects across East Africa.

Social pillar: Investing in education, healthcare, housing, and social protection to build a just and cohesive society. Environmental sustainability: Promoting renewable energy, increasing forest cover, ...

KenGen Kenya is developing a 42.5 MWp floating photovoltaic array at Kamburu Dam (part of the "Seven Forks" cascade), paired with a 3 MW/4.5 MWh battery-energy storage system ...

This project is more than just an installation; it's a showcase of how advanced solar power storage can support energy resilience, reduce operational costs, and drive sustainable development in East Africa.

Located near Kamburu Dam in Embu County, approximately 150 km northeast of Nairobi, the Seven Forks solar-plus-storage project will not only inject clean energy into the national grid but ...

Kenya hybrid energy storage project investment

MW/1 hour battery storage financed by the World Bank and the Green Climate Fund (GCF). This project will provide insights that will be considered by Kenya's REI program to enable future private sector ...
