I am proud to present the National Energy Policy 2025-2034, which I believe will guide Kenya's energy sector into a future of sustainable, equitable, and resilient energy solutions.

The power industry in Kenya is fully unbundled, both vertically and horizontally, and consists of generation, transmission, distribution and retail segments. It includes participants

Did you know Kenya's Ministry of Energy now offers government subsidies covering up to 30% of home battery costs? With power outages affecting 68% of urban households and electricity prices soaring ...

The policy is grounded in Kenya's broader development goals, including Vision 2030 and the Bottom-Up Economic Transformation Agenda (BETA). It seeks to address energy poverty, reduce carbon ...

The BESS project has been identified as a possible solution to increased proportion of intermittent energy to the Kenyan power system and energy curtailment during off peak hours. The ...

The Kenya Electricity Generating Company (KenGen) is looking to build a battery energy storage system (BESS) for its solar power plant at the Seven Forks Dams. This will help improve grid stability ...

Increase the share of renewable energy in the energy mix, leveraging on the abundant renewable energy resource potential of the country to enhance energy security and achieve the national climate ...

The hybrid project dubbed "the Meru County Energy Park" will be a large-scale facility that combines wind, solar PV, and battery storage. On completion, the facility is expected to feature up to ...

This review article aims to present a comprehensive overview of Kenya's energy situation, detailing the different energy sources, the governing policies and regulations, the challenges to ...

Kenya s energy storage power station subsidy measures

This Policy seeks to address the challenges of energy access, affordability, and security whilst promoting clean energy solutions to reduce our dependence on fossil fuels and driving green ...
