The Italian energy market is marking another milestone with the addition of two battery energy storage system (BESS) projects in Sicily. With a combined capacity of 162 MW, these projects are part of the ...

As the penetration of solar power increases, grid stability has become a critical issue. In response, Italy is prioritizing the development of grid-scale battery energy storage systems (BESS ...

The Italian utility-scale battery storage market is one of the most exciting in Europe. Just under 4GWh is completed and/or operational, with a further 2GWh+ under construction.

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions--Lazio, Puglia, ...

The residential energy storage market is expected to continue to contract in 2025, impacted by factors such as Eco-bonus subsidy cuts, falling electricity prices, and high borrowing costs.

On December 21, 2023, the European Commission greenlit a substantial EUR17.7 billion state aid initiative by Italy to boost the development and integration of a centralized electricity storage ...

ACL Energy has recently announced a joint venture partnership with large-scale operator BW ESS and Penso Power, a London-based developer of grid-scale battery storage assets, for developing storage ...

On September 18, 2025, Sungrow, the global leading PV inverter and energy storage system provider, announced the signing of a supply agreement with Italian electricity generation company EP ...

Lombardy, Apulia and Latium lead the new installations, but the southern regions are gaining ground, partly because a larger share of variable renewable sources is concentrated there.

Latest on Italian energy storage project planning

Zelestra Italy develops photovoltaic, agrivoltaic, and battery energy storage (BESS) projects across six Italian regions, spanning the islands, southern, and central-northern areas, with a total pipeline ...
