---

As of Q1 2025, 43 countries have revised land allocation rules for photovoltaic (PV) systems, creating both opportunities and challenges for inverter-based solar projects.

Explore the latest U.S. solar policy changes in Sept 2025, from ITC rules to tariffs and state programs. See how they impact solar developers and markets.

In a major victory for the solar industry and the country, the BLM recently released the final Renewable Energy Rule, streamlining the process of securing and developing public land for ...

Today the U.S. Bureau of Land Management (BLM) codified SEIA's recommendations to make it faster, easier, and cheaper to build clean energy projects on public lands.

o While there are potentially other ways (such as "agrivoltaics") to mitigate the negative land-use impacts of utility-scale PV, the primary way to mitigate the inevitability of rising land costs is to minimize the ...

Abstract--The rapid deployment of large numbers of utility-scale photovoltaic (PV) plants in the United States, combined with heightened expectations of future deployment, has raised concerns about land ...

WASHINGTON -- Today, U.S. Secretary of the Interior Doug Burgum signed a Secretary's Order to more efficiently manage our nation's energy resources by permitting projects ...

BLM amended its regulations for administering solar and wind energy applications and authorizations to further facilitate responsible development on BLM-managed public lands.

The U.S. Department of the Interior's August 2025 order adds new permitting hurdles for wind and solar on federal lands. Learn how capacity density rules, stricter NEPA reviews, and longer ...

## Latest policy on land use for solar inverters

In June 2023, BLM published a proposed rule intended to "facilitate responsible solar and wind energy development on public lands managed by the BLM" within the existing framework ...
