The Krohm 48V 200Ah LiFePO4 battery, which has a high energy density and a low self-discharge rate, is a fantastic option for anybody searching for a reliable and effective power supply. NOTE: If you wish to purchase please add the number of batteries you wish to purchase to your cart and message us directly for a quote on the freight cost.

What is a 48V LiFePO4 battery?

A 48V LiFePO4 battery is a large lithium battery that comes with a built-in battery management system (BMS) to protect against various conditions. It's ideal for use in RVs, boats, cabins, or homes.

What is a 200Ah LiFePO4 battery?

A 200Ah LiFePO4 battery is a 200 Ah capacity device used to store and provide electrical energy. It consists of one or more electrochemical cells where chemical reactions occur, converting chemical energy into electrical energy (and vice-versa). They can be divided into two types: primary and secondary batteries.

How long does a LiFePO4 battery take to charge?

It takes 4 hours to charge a 200Ah LiFePO4 battery with a charging current of 40A. Keep in mind that you should not exceed the recommended charging current for your battery. Charging duration varies according to the charging current applied.
