On August 15, 2025, LONGi launched the Hi-MO X10 Light design Module, officially targeting the low-load C& I market.

In addition to immediate performance, Longi 450w panels also offer long - term reliability in low - light conditions. The panels are designed to withstand harsh environmental conditions, ...

LONGi launched its mono-PERC modules in 2016, featuring integrated PERC technology on monocrystalline silicon and low light degradation, and its cell efficiency has increased from 21% to ...

Backed by advanced technologies, our modules feature excellent power ratings and top conversion efficiencies, and can be used across all market segments. Our field-proven bifacial modules deliver ...

China -- LONGi has unveiled a lightweight solar module designed to address installation challenges on rooftops with limited load-bearing capacity, a factor that prevents an estimated 30% of ...

Upgrade your projects with LONGi's most advanced C& I module yet, powered by HPBC 2.0 technology for record-setting efficiency and stable yields even in low light.

LONGi had initiated carbon reductions with green supply chain in solar industry to facilitate low carbon economic development and realizations of climate goals. LONGi joined the initiatives of RE100, ...

LONGi's technological and manufacturing leadership in solar wafers, cells and modules underscores our commitment to helping accelerate the clean energy transition. By offering high-quality, reliable ...

The launch of the Hi-MO X10 Light Design Module not only address the pain points of the low-load rooftop market, but also represents another implementation of LONGi's " scenario-based+ ...

Built on HPBC2.0 technology, LONGi Hi-MO 9 modules deliver exceptional performance in temperature

Longi low-light solar power generation

control, low-light power generation and operational reliability. Thanks to their excellent ...
