The hybrid model, which combines solar energy generation with the existing hydropower plant, aims to tackle the annual energy demand challenges during Liberia's dry seasons.

Strategically located at the Mount Coffee Hydropower Station, the new solar facility will leverage existing infrastructure and resources to maximize benefits while mitigating potential risks.

The project is ongoing under the oversight of the Rural and Renewable Energy Agency (RREA) and comprises of a 5.0 MW solar plant to provide power supply for a 33 kV distribution ...

UAE's Global South Utilities (GSU) will develop a 50-MW solar farm, coupled with 25 MWh of battery energy storage capacity, in Madagascar, as part of a broader partnership with local ...

The plant will feed its clean electricity directly into a medium voltage field of the heavy fuel oil power plant, thus avoiding the combustion of approximately 1.3 million liters of heavy fuel oil per year.

Global South Utilities (GSU) has secured agreements with Madagascar to develop a 50 MW solar plant and a 25 MWh battery energy storage system (BESS) in the island nation.

The project will deliver 106MW of solar PV with battery storage and expand hydro capacity by 41MW. It will also upgrade transmission and distribution infrastructure in Liberia, Chad, ...

Toronto Stock Exchange-listed developer NextSource Materials has confirmed that the solar-hybrid-storage development for its Molo graphite project in Madagascar has been completed.

Tata Power has a foothold in the region through three hydropower stations: Khopoli, Bhivpuri, and the Bhira station, which includes a 150MW pumped storage hydro project.
