-----

By implementing solar-powered resilience hubs, we strengthen our neighborhoods, reduce carbon emissions, and create more equitable access to essential resources.

According to the American Clean Power Association (ACP), streamlined interconnection reforms across regional transmission organizations and utilities helped drive this surge, positioning ...

By using less grid electricity, a solar PV and battery system at Sabathani could also avoid up to \$728k in health damages across the South Minneapolis area from sulfur dioxide, nitrogen oxide, and ...

The hub homes idea started after Winter Storm Uri in 2021, when freezing temperatures crippled Texas' power grid for five days and led to 246 storm-related deaths, according to the Texas Department of ...

Doris Brown's home in Northeast Houston is a refuge for neighbors during power outages thanks to her solar panel and battery system. Her house is part of a pilot program creating resilience "hub homes" ...

If a site wants to maintain 100 percent of normal operations during ...

The U.S. solar industry saw a range of notable policy developments in December as lawmakers, regulators, and industry groups advanced efforts to expand community energy, improve solar ...

Nonprofits have installed rooftop solar for 10 low-income homes in northeast Houston, adding battery systems at three.

After Texas grid failures, Houston neighbors built solar-powered "hub homes" for emergencies. A federal funding cut now threatens the program's growth.

If a site wants to maintain 100 percent of normal operations during an outage, the solar and storage must be sized accordingly. Augmenting rooftop solar with ground mount solar to ...
