What are outdoor Telecom cabinets?

Outdoor telecom cabinets are built to withstand harsh environmental conditions. These enclosures protect telecommunication equipment from rain, dust, extreme temperatures, and unauthorized access. They are commonly used in remote locations, such as cell tower sites, roadside installations, and industrial areas.

What is an indoor Telecom cabinet?

Indoor telecom cabinets are designed for controlled environments like data centers, server rooms, and office spaces. These enclosures provide a secure and organized space for housing telecommunication equipment. Since they are used indoors, they do not require extensive weatherproofing.

Why should you choose a telecom outdoor cabinet?

An outdoor telecom cabinet is a worry-free solution for safeguarding your equipment from moisture and harsh environmental conditions. KDM's cabinets are factory tested and feature double-wall construction and a tight seal. They come with accessories such as enclosure fans and power options.

What are specialized telecommunications rack cabinets?

Specialized telecommunications rack cabinets are tailored for unique applications. Unlike standard telecom cabinets, these racks focus on providing open access and enhanced airflow. They are ideal for environments where physical protection is not a primary concern, such as secure data centers or labs.
