What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.

What is a C-Liberty Pon enclosure?

The C-Liberty(TM) Series Compact PON Enclosure ensures high-density fiber distribution in a space-efficient, ROI-friendly design. It's built to perform in virtually any deployment scenario -- pre-configured stub cable, patch, and splice -- and can be pole-, pad-, or wall-mounted.

What are the features of our enclosures?

Versatile installation features: Our enclosures have two universal wall and pole mounting brackets and an adjustable and removable back plate. This construction allows for smooth installation on various surfaces and integration of equipment inside or outside without drilling additional holes.
