This report provides a global survey from IEA PVPS member countries of efforts being made to design new materials for photovoltaic cell and module applications.

The New Third Board provided a sort of Goldilocks solution: lower entry barriers + retail investor access. By Q2 2025, Aido raised \$150M through convertible bonds at just 5.2% yield.

This presents a technology risk for the industry. This report provides a global survey from IEA PVPS member countries of efforts being made to design new materials for photovoltaic cell and module ...

Conducting research on PV cell and module design aims to deliver technologies that drive down the costs of solar electricity by improving PV efficiency and lowering manufacturing costs while ...

In this comprehensive article, we embark on a deep exploration of third-generation photovoltaic cells, shedding light on their significance and the immense potential they hold for the future of clean energy.

BEIJING, May 20 (Xinhua) -- Companies listed on China's "new third board," a financing platform for small and medium-sized enterprises (SMEs), have accelerated their innovation drive, with more firms ...

When Hairun Photovoltaic applied for listing on China's New Third Board in 2024, industry watchers immediately recognized this as more than routine corporate maneuvering.

These advances are making solar technology more powerful, affordable, and versatile, accelerating the adoption of solar energy technology across residential, commercial, and utility-scale ...

Why Investors Are Eyeing PV Cell Investments via NEEQ The New Third Board (NEEQ), China's over-the-counter equity market, has become a hotbed for photovoltaic (PV) cell acquisitions.
