Capacity:30MW Location: Yuling,Shaanxi,China CATEGORY Utility Project TAGS C Series - Classic Module

The PV module of Yingli Solar silently begins its daily energy harvesting as the first light of dawn appears on the planet. These deep blue PV panels convert the sun's abundance into clean electricity...

Now, new-energy vehicles, lithium batteries, and photovoltaic products are highly competitive in the international market.

China's solar panel installations surged in the first half of the year as developers sought to complete projects before the new policy, which removed a guaranteed rate of return, took effect.

China installed more solar panels in power plants than on rooftops last year for the first time since 2020 as President Xi Jinping's push to build large-scale renewable facilities in inland ...

China is apparently deploying scarce solar assets irrationally, installing substantial numbers of solar panels in several renewables-poor provinces while largely ignoring sun-soaked ...

Compared to a thermal power plant with the same gross electricity generation capacity, these panels reduce the annual usage of standard coal by about 330 metric tons and carbon dioxide ...

Regarding the decision to install photovoltaic panels on the roof of her house, villager Zhang Hui told the Global Times that by installing photovoltaic panels on their roofs, they earn extra ...

China has established a solid foundation for developing green energy, playing a significant role in driving the global energy transformation and responding to climate change. In recent years,...
