The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Access our tools to explore solar geospatial data for the contiguous United States and several international regions and countries. This is a list of resources intended to help developers ...

Accurate mapping of photovoltaic (PV) power plants is critical for monitoring the development of solar energy generation and supporting PV operational management, policy-making, ...

Download maps of GHI, DNI, and PV output power potential for various countries, continents and regions.

The GSA provides an interactive map of solar resource and photovoltaic power potential and a variety of other environmental data relevant for understanding the practical and technical potential of solar ...

Click the images below to view maps of concentrating collector and tilted photovoltaic panel solar energy resources on BLM-administered lands in the six-state PEIS study area. These maps are based on ...

Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic (PV) ...
