Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet. See Figure 2 and Figure 3 for line-up-and-match configuration views. Contains two or three battery strings to be used with the 93E 30 kVA UPS.

How is a ups connected to a battery cabinet?

In standalone configurations power wiring is routed using external conduit. Connections are made to easily accessible terminals at the back of the cabinet. Line-up-and-match battery cabinets are installed adjacent to the UPS.

How do you install an EBC on a ups cabinet?

Roll the EBC to the final installation location on the right side of the UPS cabinet making sure the doors are flush with each other. Use leveling feet only to lock the cabinet in place. Using the leveling feet to raise the cabinet may result in serious injury to personnel or damage to the cabinet.

What is an external battery cabinet (EBC)?

The External Battery Cabinet (EBC) is available in two models to meet the needs of the Eaton 93E UPS product line. The following sections detail the battery specifications, battery runtimes, and the environmental and safety specifications for the UPS. Service conferrable 0.5-34A per string, with overall maximum of 34A (limited by input current).

In this chapter, instructions here are only for horizontal installation such as: installation in a 19-inch cabinet. Vertical installation is similar. All equipment must be placed steadily after installation.

Connect the power system's battery cable terminated in an Anderson connector to the first battery cabinet's battery cable terminated in a mating Anderson connector.
