What is a powerpack pro?

Designed using a high quality 48V based lithium ferrous phosphate battery solution (LiFePO₄), the powerpack pro solution provides a 110V highly stable pure sine wave output through a 16A socket. As well as reliable AC output, the Pro Series provides multiple DC outputs for 12V USB 3.0 and type-C with up to 100W output.

What is a Pro Series powerpack?

All Pro Series Powerpacks are capable of delivering the specified power output for the entire capacity i.e. 100% to 0% state of charge. They also have excellent overload capability and will provide 115% of the specified output depending on state of charge and temperature. View the whole range here on our Pro Series Datasheet.

Can a battery pack work with a power tool?

Most power tool manufacturers offer a range of battery packs that are designed to work with their tools. It is best to check the compatibility of the battery pack with your tool before making a purchase, as using an incompatible battery pack can damage your tool and potentially cause injury.

What is the best battery pack for power tools?

If you are looking for a reliable and powerful battery pack for your power tools, the Milwaukee M18 REDLITHIUM 8.0 Ah Battery Pack is a great option. This Lithium-Ion battery pack has a high capacity of 8.0 Ah, which means you can work for long hours without worrying about running out of power.

Keep your phone, laptop, handheld gaming console, and other electronics running with these travel-friendly power banks.
