As Europe continues its transition to a more sustainable and resilient energy system, energy storage remains a critical enabler of renewable energy expansion. The report underscores ...

The EU's battery energy storage fleet has grown for the 12th consecutive year, marking yet another record year for new installations. According to a new report from SolarPower Europe ...

The EU installed a record 27.1 GWh of new battery storage capacity in 2025, driven by utility-scale projects that accounted for over half of new additions as the bloc races to build the ...

A resilient and cost-efficient energy system requires both centralised and decentralised flexibility, making the reactivation of residential and commercial storage a priority. This edition of the ...

With storage capacity forecast to grow by a further 115% by 2030, this will play a crucial role in Europe's energy transition, creating more space for renewables on the grid. Since 2020, ...

Since 2020, the Commission publishes yearly progress reports on the competitiveness of clean energy technologies that present the current and projected state of play for different clean and ...

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, marking a ...

It offers near real-time data on the deployment of storage facilities across Europe, including an interactive dashboard and map, and identifies all the technologies, from battery storage ...

Discover all statistics and data on Energy storage in Europe now on statista !

The latest edition of the European Market Monitor on Energy Storage by the European Association for

Progress of EU energy storage power stations

Storage of Energy and LCP Delta, released on 31 March, highlights Europe's rapid ...
