-----

Solar cycle predictions are used by various agencies and many industry groups. The solar cycle is important for determining the lifetime of satellites in low-Earth orbit, as the drag on the satellites ...

Solar cycles follow a numbering system that began with Solar Cycle 1 in 1755. We are currently in Solar Cycle 25, which started at solar minimum in December 2019. This solar minimum...

Solar cycle, period of about 11 years in which fluctuations in the ...

Each month the solar prediction is updated using historical and the latest month's observed solar indices to provide estimates for the balance of the current solar cycle and the next.

HF Radio: Weak or minor degradation of HF radio communication on sunlit side, occasional loss of radio contact. Navigation: Low-frequency navigation signals degraded for brief intervals.

Solar cycle, period of about 11 years in which fluctuations in the number and size of sunspots and solar prominences are repeated. Solar cycle 25 began in 2019 and will reach ...

List of solar cycles Solar cycles are nearly periodic 11-year changes in the Sun 's activity that are based on the number of sunspots present on the Sun's surface. The first solar cycle conventionally is said ...

As part of the Space Weather Prediction Center's rollout of our improved website, the content from the Solar Cycle Progression page is being provided in a new way.

In this paper we describe how the Space Weather Prediction Center (SWPC), as a division of the National Oceanic and Atmospheric Administration (NOAA), currently addresses solar ...

List of solar cycles Solar cycles are nearly periodic 11-year changes in ...

## Public solar cycle system

The graph below shows you the number of C, M and X-class solar flares that were produced during past month together with the sunspot number of each day. This gives you an idea of the solar activity ...

The Sun's outbursts, including eruptions known as solar flares and coronal mass ejections, can disturb satellites and communication signals traveling around Earth. Scientists study ...
