What is a Stafl battery management system (BMS)?

Stafl Systems carefully designs its battery management systems (BMS) to ensure unparalleled accuracy, reliability, and safety, providing significant benefits in precise state-of-charge (SOC) and state-of-health (SOH) measurements.

Who is Stafl systems' preferred battery cell supplier?

Under this alliance, Amprius will serve as Stafl Systems' preferred battery cell supplier by providing its high-performance SiCore TM battery cells. Amprius will work closely with Stafl Systems to facilitate timely battery evaluation and testing to ensure optimal performance for its targeted applications.

Who is Stafl systems?

Stafl Systems designs and manufactures battery packs and powertrain solutions for the aviation, marine, off-highway and defense industries. Stafl's technology includes advanced and highly accurate Battery Management Systems, battery packs with high-performance cooling and both active and passive safety systems.

How does Stafl systems improve battery performance?

To refine our BMS algorithms, Stafl Systems submits battery cells to accelerated charge and discharge cycles where we vary the ambient temperature and collect specific cell performance data. This is then logged and analyzed to provide a clear picture of a cell's true performance.

Stafl Systems designs and manufactures high-voltage lithium-ion battery packs to meet different application needs. Each battery features a built-in Stafl Systems BMS for safety, control and ...

Amprius Technologies, Inc., a maker of next-generation lithium-ion batteries with its Silicon Anode Platform, has established a strategic partnership with Stafl Systems, a pioneer in ...

Using Stafl Systems BMS technology, the pack provides safety and reliability, while maintaining the flexibility to use the pack as a standalone system or as a module in a larger ...

Stafl Systems BMS1000 Series Battery Management Systems use a modular system consisting of one BMS Master Module (e.g. BMS1000M) and 1 to 64 BMS Monitor Modules (e.g. BMS1101S / ...

STAFLBMS Battery

Lithium-ion batteries require sophisticated management systems to control proper charging and discharging. Properly integrated into a battery pack design, Stafl Systems world-class BMS products ...

With advanced features such as accurate State of Health (SoH), State of Charge (SoC), and Safe Operating Envelope technologies, it provides real-time information on battery pack conditions.

Stafl's technology includes advanced and highly accurate Battery Management Systems, battery packs with high-performance cooling and both active and passive safety systems.

This EV battery incorporates Stafl Systems' BMS technology to monitor the state of charge (SOC), state of health (SOH), cell temperatures, and voltage to ensure safety and reliability and eliminate the ...

Get accurate State of Health, State of Charge and Safe Operating Envelope data for your battery pack. The BMS1101S Monitor Unit measures the voltages of 6 - 12 series connected battery cells, and can ...

Stafl Systems is engineering a clean energy future by providing industry-leading lithium-ion battery management, systems architecture, and energy storage solutions.
