In light of these gaps, this study aims to critically examine the CER effectiveness of community microgrids, clarifying their feasibility as a policy tool for energy transition with a theoretical ...

The Clean Coalition's Community Microgrids are designed to provide indefinite, renewables-driven backup power to critical facilities. Our Community Microgrid Initiative will provide a standard ...

By integrating various renewable energy sources and storage technologies, community microgrids can enhance energy resilience, reduce dependency on centralized grids, and mitigate the impact of...

To achieve our Community Microgrid vision, the Clean Coalition is designing and staging numerous Solar Microgrids at critical community facilities, which will be ready to connect to larger Community ...

The Clean Coalition established the Community Microgrid Initiative in 2010 to harness local solar and energy storage to deliver an unparalleled trifecta of economic, environmental, and resilience benefits ...

This research seeks to quantify the potential benefits of urban community microgrids, based on the development of planning models with deterministic and stochastic optimization approaches.

Why We Need Community Microgrids
The Value-Of-Resilience
Transitioning Our Energy System
Key Stakeholders For Community Microgrid Success
It's time to modernize our energy system and move it into the present. What worked in the past is no longer viable. Our centralized power grid is so last century, as our friends at the World Business Academy explain in this excellent video: The future is here -- in the form of Community Microgrids.

Santiago community microgrids

Resilience indicators should improve the performance of microgrids in rural areas. Rural microgrids offer a development opportunity for V2G solutions.

This article illustrates how informal and formal institutions play a significant role in the growth of community microgrids in existing electricity grids and provide interesting examples which ...

There are many communities in the world vulnerable to natural disasters, however, they require support and expertise to develop microgrids. Using our technical, regulatory and policy expertise on ...
